

Online System Registration Instructions for AP Chemistry

Please register for both of our online systems, and record your username and password so you will remember them in August when you are completing your summer assignment. Email Ms. Hapka at ahapka@ccps.org if you have any difficulty in registering for these services. Do not start a new account if you have already used the Texas system, continue to use your old login information. Please complete registration for both of these before the end of the school year in case you need assistance.

Registration for Texas Homework Service

Step 1: Obtain a UT EID

NEVER create a second EID. One EID will allow you to log into multiple classes in the system. To obtain your EID, go to the <https://utdirect.utexas.edu/index.html> and select the "**get a UT EID**" option. Follow the directions provided there. (You **MUST** accept all cookies in order to communicate with the EID web pages.) If the system tells you that an EID already exists with your last name and birth date, you may already have an EID. Follow the instructions provided by the system.

Please store the EID and password in a safe place.

NEVER create a second EID.

Step 2: Register with the Homework Service

Obtain the unique number from your instructor. 10456 (ap chemistry)

Enroll in our course, your instructor will then approve your enrollment.

Enroll in our Moodle Course

Go to ccps.mrooms.org

Log into the system: your username is firstname.lastname, your password is: changeme.

Click on the science link under ccps student courses.

Choose our AP Chemistry course.

The enrollment key for the course is "apchem"
