Certifications, Citizenship, Skills & Technology

AHP-Certified Clinical Medical Assistant

This program uses projects and problem based learning, classroom and lab instruction to teach students about the field of healthcare. There will be some clinical and/or internship experience within the program. Students will learn both administrative and clinical duties such as how to perform basic lab tests; medical office management; prepare patients for physical examinations; take readings of patients' vitals: temperature, pulse, respiration, and blood pressure; emergency procedures; chart procedures; sterilization techniques; and perform EKGs. Career opportunities are found in doctors' offices, clinics, hospitals, health maintenance organizations, and adult care. Students can earn CPR/AED/First-Aid certifications. Students will take the CCMA Certification Exam. Upon successful completion of the exam, students receive a provisional certificate. After graduation, students submit their diploma and the provisional becomes full certification after graduation.

Courses in the program

Foundations of Medicine and Health Science provides students with an overview of the therapeutic, diagnostic, environmental and information systems of the healthcare industry. Students learn about ethical and legal responsibilities, as well as the history and economics of healthcare. Students will engage in processes and procedures that are used in the delivery of essential healthcare services.

Structures and Function of the Human Body students study the structure and functions of the human body, including cellular biology and histology. Systematic study involves homeostatic mechanisms of the integumentary, skeletal, muscular, circulatory, nervous systems and special senses. Students will investigate the body's responses to the external environment, maintenance of homeostasis, electrical interactions, transport systems, and energy processes. Students will conduct laboratory investigations.

Certified Clinical Medical Assistant

focus will cover all areas that students need to prepare for the certification exam. Topics covered are patient care, communication, office administration, medical law and ethics, phlebotomy and EKG monitoring. Students will also participate in a clinical and/or an internship setting to further skills they are learning in preparation for the certification exam.

Pre: Algebra I (or equivalent)
